THE FEEDBAG

From the Prez.

May 25 , 1999

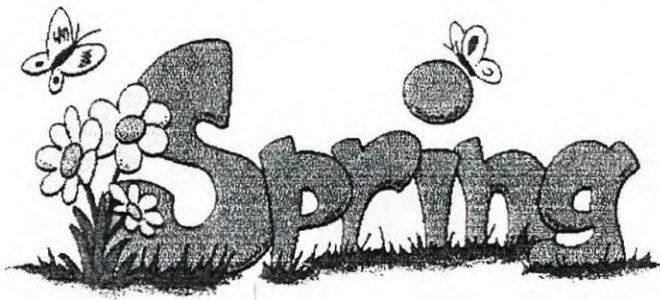

Hi Everyone,

Well we are just under two weeks away from the 17th Annual W.E.M. All Ford Show and Swap on June 6th. I trust that everyone has their cars all cleaned up and ready to show off? :-) We're hoping for great weather and a ton of cars to show up. We are also still looking for volunteers to lend a hand the day of the show. If you can spare some time that day, please stop by the club table or flag me down and we will find something for you to do. With everyone pitching in, I'm sure the show will be a GREAT success !!!

I want to take a moment to talk to everyone about participation in club activities. I understand in todays day and age that there are more and more things to do and less and less time to do them in. We have been trying for a number of years to come up with club trips and activities that the whole club can enjoy. We want to see people take their cars out and enjoy them. So far all our efforts have not been too successful. Take for example the May 16th day trip to Olde World Wisconsin. We had a total of one couple call up and say they were going. That was it for calls two people. That's a little sad people. I dont' know what to do about day trips. It is almost to the point where I'm going to give up doing them. We've asked for ideas from you on what you'd like to do. We've asked for help in planning day trips. There hasn't been a whole lot of response from anyone. Maybe the thrill is gone. Maybe no one wants to get their cars dirty. I don't know. I'm not singling anyone out, I just want to know what you want. If you don't want day trips, tell us and we won't put the time into planning them. If you can step up and plan one GREAT ! I'll take all the help we can get. I just don't want to see this club drift apart and not do anything. I'm always available for your calls, 414 -567-2622. Please give it some thought. As I've said in the past, this is your club. Enjoy it !

One last thing, speaking of club participation. Don't forget to mark June 12th on your calendars. The Watertown Bike Rodeo / Car Show will be held at the Watertown High School from 8:15 am until 11:00 am. Come on out with your cars and spend the morning relaxing with friends. There will be five trophies awarded for the show. After the show we will be taking a short cruise to get some ice cream. Details will be finalized at the show. For more info call ... Phil Neidner at 920-262-9260. Lets make sure we have a good showing of club cars ! It'll be FUN :-) Thanks and we hope to see alot of you out at the upcoming shows !

Scott

FROM YOUR EDITOR

FORD TO OPEN USED PARTS CHAIN

Ford Motor Co. is opening up a chain of used auto parts centers, but don't call them junkyards. The auto parts recycling centers will have computerized inventories and shipping systems designed to cut cost and reduce waiting times to get a car or truck repaired. Ford said it aims to become the global leader in recycled parts, creating a business with \$1 billion a year in revenue within a few years.

THANKS TO THOSE WHO CONTRIBUTED

I would like to extend a thank you to the club members who helped in procuring thing to add to our show Goodie Bag. Because of their efforts we will have a decent supply of trinkets in the bag this year. THANKS GO TO

Differences Between 1964-1/2 and 1965 Mustangs

This is an overview to help determine if your car is a 64-1/2 or not. The car may have all of the items listed, or just a few. This can be due to variations in production lines and parts supply at that plant. Some items can carry over into the 65 production line, as people on the line would use up what they had. There are other detail items, such as casting numbers, that have been intentionally missed due to space.

Logistical

- * Production began March 9, 1964 and ended August 17, 1964
- * Only Coupes and Convertibles were produced during this time
- * Only Generator equipped cars were produced during this time
- * Date codes are ÖCÖ through ÖHÖ, found on the Data plate

Engines Displacement & Code

- * 170 cubic inch 6cyl 1bbl "V"
- * 260 cubic inch 8cyl 2bbl "F"
- * 289 cubic inch 8cyl 4bbl "D"
- * *289 cubic inch 8cyl 4bbl "K"
- * * Available in June of 1964

Exterior

- * The Gas Cap has no retaining wire.
- * The edges of the Hood have stiffening skirts (bevels) on its lower left and right side
- * The Grill panels have corresponding bevels to the hood skirts
- * The Mustang lettering on the front fenders is 4-3/8", later lengthened to 5"
- * Windshield Wiper shafts bases are pot metal and have a threaded escutcheon

Interior

- * Door Locks are color-keyed to interior, changed to chrome in later production
- * Owners Manual states 170 C.I. six cylinder, and the 260 low compression V8, and the

Hi-Performance 289 V8

- * The fresh air vent on the drivers side is marked with a White "A"
- * Door handles and Window cranks are held by concealed spring clips, not allen-head screws
- * Instrument Cluster has red GEN light (Generator), later models had red ALT light
- * Heater blower is two speed with OFF position located in center
- * Carpet had color-keyed rubber heel pad, no toe pad, as in later models
- * Carpeting stops at inner rocker panel, with color-keyed vinyl under door sill plate
- * Front Seatbelts are secured with an eye bolt, later changed to hex-head bolt
- * Passenger seat was not adjustable
- * Smaller "T" handle on automatic transmission cars

Trunk

- * Mat is grey burtex in hardtops, and speckled grey rubber in convertibles
- * Spare tire hold down is slotted for anchor bolt
- * Tail lights have 3 wire pigtail assembly

Engine Compartment

- * Hood Bumpers have recessed phillips screw to hold bumper to stud
- * Radiator Core support has air vents/louvers in front of batter box for cooling
- * Horns are larger than on later models and mounted on the frame behind radiator
- * Generators are installed, have black rubber shroud
- * Oil dipstick is on passenger side and very long
- * Oil filler tube is on front cover of engine, not valve covers
- * Small flip open oil cap on distributor base
- * Coils is mounted flat on intake manifold
- * Brake switch (2 wires) is mounted on the master cylinder
- * Engine has a road draft tube, with /without a PCV valve
